

SUPPLEMENTARY FIGURE. Ratio of emergency department visits,* new hospital admissions, and deaths[†] to 1,000 COVID-19 cases, by COVID-19 high transmission period,[§] — United States, December 1, 2020–January 15, 2022

Abbreviation: ED = emergency department.

* Includes visits from 70% of US EDs.

[†] Case counts are lagged by 3 weeks to account for time between case ascertainment and report of death.

[§] COVID-19 high transmission periods defined as December 1, 2020–February 28, 2021, for the Winter 2020–21 circulation period, July 15–October 31, 2021, for the Delta Variant circulation period, and December 1, 2021–January 15, 2022 for the Omicron circulation period.
